

What's been happening this week at Fairley House...

The sunshine is meant to be with us this weekend; we hope that lots of you will get to relax and enjoy it. Another action-packed week at school to share with you:

## Year 6 Science (CS)

Y6 have been studying electrical circuits and how to draw diagrams with its symbols. They have done an experiment where they were representing electrical circuits using different sweets as a model: strawberry laces as wires, cola sticks as switches and mint sweets as bulbs, motors or buzzers. **Ms Dolz**

## Year 10 Science contd.... (CS)

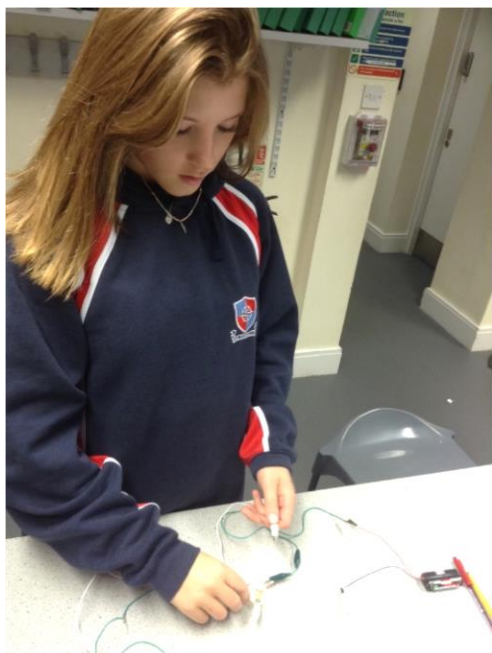

## Year 11 Science (CS)

## Year 10 Science (CS)

In Science, Year 10 have been studying the Earth's atmosphere. The learning objective was to know the tests for different gases. They experimented in the making of oxygen, hydrogen and carbon dioxide as well as testing for the presence of each. **Mrs Lyon**

Year 11 have continued to learn about electricity. They have wired a plug and can describe the use of each of the components. Year 11 have also measured current and voltage in circuits in order to calculate power and resistance.
